UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA

8 JEFFREY LEE DUVARDO,
9 Petitioner,
10 v.
11 GEORGE GIURBINO, warden,
12 Respondent.

No. C 05-5428 MHP (pr)

**ORDER DENYING HABEAS
PETITION**

INTRODUCTION

15 Petitioner Jeffrey Duvardo filed this pro se action seeking a writ of habeas corpus
16 under 28 U.S.C. § 2254. The matter is now before the court for consideration of the merits
17 of the amended petition. For the reasons discussed below, the amended petition will be
18 denied.

BACKGROUND

20 | A. The Crimes

Petitioner challenges his conviction for murdering his parents. The California Court of Appeal gave a very lengthy description of the circumstantial evidence, Cal. Ct. App. Opinion, pp. 1-19, which this court only summarizes briefly here, although much of the evidence is discussed later as it relates to the various claims asserted by Petitioner.

Petitioner lived in the city of Valencia, north of Los Angeles. His parents, Mary Ann and Donald Duvardo, lived in the town of Nice in Lake County, California. (First names are used for clarity because many of the people involved have the same last name.) Mary Ann and Donald were murdered in their home. Donald had been stabbed about 15 times in the

1 chest. Mary Ann had been stabbed and slashed several times, had her carotid artery or
2 jugular vein slit, and had been hit in the eye. Their bodies were discovered on April 6, 1999.
3 The prosecution theorized that, on March 31, 1999, the 43-year old Petitioner drove from
4 Valencia to Nice, killed his parents, and drove home the same day. The prosecution
5 theorized that Petitioner killed his parents to avoid repaying a \$30,000 loan from them and to
6 keep secret from his second wife the fact that the loan existed and the fact that he was still
7 married to his first wife. The prosecution presented evidence regarding Petitioner's motive,
8 opportunity, and financial difficulties. Petitioner presented an alibi defense that he was at
9 work in Southern California when his parents were killed in Lake County, and contended that
10 the victims could not have been killed on the date the prosecution theorized because their
11 bodies were not sufficiently decomposed when found six days thereafter.

12 **B. Procedural History**

13 Following a jury trial in Lake County, Petitioner was convicted of two counts of first
14 degree murder and two counts of elder abuse. See Cal. Penal Code §§ 187, 368(b)(1). The
15 jury found true the multiple murder special circumstance allegation. See Cal. Penal Code
16 § 190.2(a)(3). Although the district attorney had earlier announced his intention to seek the
17 death penalty, that was dropped after the guilty verdicts were returned. On May 16, 2002,
18 the court sentenced Petitioner to two concurrent terms of life imprisonment without the
19 possibility of parole for the murders and stayed the sentences for the elder abuse convictions.
20

21 Petitioner appealed. The California Court of Appeal affirmed the conviction and the
22 California Supreme Court denied the petition for review. Petitioner filed unsuccessful state
23 habeas petitions.

24 Petitioner then filed this action, seeking a writ of habeas corpus. The case was stayed
25 while Petitioner exhausted state court remedies as to some claims. After exhausting state
26 court remedies, Petitioner filed an amended petition that had seven claims: (1) Petitioner's
27 right to due process was violated because the evidence was insufficient to support the
28 verdicts, (2) his right to due process was violated by the admission of "victimology" expert

1 opinion evidence, (3) his right to due process was violated by the admission of impermissible
2 character evidence, (4) his rights to effective assistance of counsel and due process were
3 violated by counsel's failure to submit critical items of evidence to proper forensic testing
4 and/or examination, (5) his right to due process was violated by the exclusion of evidence
5 about cars seen near the victims' home, (6) cumulative error, and (7) his rights to due process
6 and effective assistance of appellate counsel were violated by appellate counsel's failure to
7 raise critical issues in the original appeal. The court found the federal constitutional claims
8 to be cognizable and issued an order to show cause why the petition should not be granted.
9 Respondent filed an answer and Petitioner filed a traverse. The matter is now ready for a
10 decision on the merits of the amended petition.

JURISDICTION AND VENUE

12 This court has subject matter jurisdiction over this habeas action for relief under 28
13 U.S.C. § 2254. 28 U.S.C. § 1331. This action is in the proper venue because the challenged
14 conviction occurred in Lake County, California, within this judicial district. 28 U.S.C. §§ 84,
15 2241(d).

EXHAUSTION

17 Prisoners in state custody who wish to challenge collaterally in federal habeas
18 proceedings either the fact or length of their confinement are required first to exhaust state
19 judicial remedies, either on direct appeal or through collateral proceedings, by presenting the
20 highest state court available with a fair opportunity to rule on the merits of each and every
21 claim they seek to raise in federal court. See 28 U.S.C. § 2254(b), (c). The parties do not
22 dispute that state court remedies were exhausted for the claims in the amended petition.

STANDARD OF REVIEW

24 This court may entertain a petition for writ of habeas corpus "in behalf of a person in
25 custody pursuant to the judgment of a State court only on the ground that he is in custody in
26 violation of the Constitution or laws or treaties of the United States." 28 U.S.C. § 2254(a).
27 The petition may not be granted with respect to any claim that was adjudicated on the merits
28 in state court unless the state court's adjudication of the claim: "(1) resulted in a decision that

1 was contrary to, or involved an unreasonable application of, clearly established Federal law,
2 as determined by the Supreme Court of the United States; or (2) resulted in a decision that
3 was based on an unreasonable determination of the facts in light of the evidence presented in
4 the State court proceeding." 28 U.S.C. § 2254(d).

5 “Under the ‘contrary to’ clause, a federal habeas court may grant the writ if the state
6 court arrives at a conclusion opposite to that reached by [the Supreme] Court on a question of
7 law or if the state court decides a case differently than [the] Court has on a set of materially
8 indistinguishable facts.” Williams (Terry) v. Taylor, 529 U.S. 362, 412-13 (2000).

9 “Under the ‘unreasonable application’ clause, a federal habeas court may grant the
10 writ if the state court identifies the correct governing legal principle from [the] Court’s
11 decisions but unreasonably applies that principle to the facts of the prisoner’s case.” Id. at
12 413. “[A] federal habeas court may not issue the writ simply because that court concludes in
13 its independent judgment that the relevant state-court decision applied clearly established
14 federal law erroneously or incorrectly. Rather, that application must also be unreasonable.”
15 Id. at 411. A federal habeas court making the “unreasonable application” inquiry should ask
16 whether the state court’s application of clearly established federal law was “objectively
17 unreasonable.” Id. at 409.

DISCUSSION

19 || A. Sufficiency Of The Evidence

Petitioner contends that there was insufficient evidence to support the murder convictions. Specifically, he challenges the adequacy of the proof that he was the person who murdered his parents and that the killings occurred on March 31, 1999. The date of death was critical because that March 31 was the only day on which the prosecution tried to show he had time to make the trip to the site of the murders.

²⁵ The California Court of Appeal rejected the insufficient evidence claim:

26 The various threads of circumstantial evidence combine to make a quilted pattern of
27 guilt. Viewed in the light most favorable to the judgment, the evidence shows the
Duvardos were killed on the morning of March 31—and it was defendant who killed
them.

1 The Duvardos were last seen March 30. From about 7:00 on the morning of
 2 March 31, they did not answer their phone, use their e-mail, or follow their habit of
 3 picking up their mail and newspapers each day at 11:30 a.m. On the last morning of
 4 their lives they had had their coffee, but had not yet cleaned the coffeepot. The clock
 5 in the bedroom had fallen to the floor when the home was ransacked and had stopped
 6 at 10:25. The medical evidence of time of death was inconclusive, but consistent with
 7 the People's theory of the case—that, as Safarik opined, the Duvardos were killed
 8 sometime on March 31 between 7:30 and 10:20 or 10:25 a.m.

9 No signs of forced entry were found, meaning the Duvardos knew their assailant and
 10 let him in their home. Two experienced law enforcement officers, a detective and an
 11 FBI expert in crime scene reconstruction, believed the crime scene was staged. The
 12 expert opined the staging was done because the killer would be an obvious suspect
 13 and wanted to divert the attention of the investigation to a hypothetical anonymous
 14 burglar.

15 Defendant was an early riser, accustomed to getting up at 3:45 or 4:00 a.m. He had
 16 sufficient time to rise, drive the six or so hours to his parents['] house, kill them at
 17 10:20 or 10:25 a.m., and drive back to southern California—where he placed a call
 18 from his home phone at 6:26 p.m. On March 31 he already had the rental car, which
 19 he had secured the day before—when he had rented the car for two days while putting
 20 his own car in the shop for two hours' work. He put 1,128 miles on the rental car,
 21 which was roughly equivalent to the round trip between the rental agency and his
 22 parents' house. Defendant knew that Wednesday, March 31, he would not have his
 23 typical visitation with his daughter Nicole. He presumably also knew his wife would
 24 have a business meeting after work and would not be home until late.

25 Although defendant claimed he had not visited his parents for a year, his blood was on
 26 a wadded up towel in the master bathroom—but the towel belonged in the kitchen. The
 27 towel, which had air dried, was lying in the sink—in the home of a meticulous
 28 housekeeper who would have put the towel in the laundry bin. This leads to the
 29 reasonable inference defendant was recently in the house and had cut himself during
 30 the vicious attacks and left the towel behind. 7/

31 [footnote 7:] We are aware that defendant contradicted himself and claimed to
 32 have visited his parents early in 1999. That still does not explain why a tidy
 33 housekeeper would leave a wadded up kitchen towel, stained with blood, in the
 34 sink of her master bathroom.

35 Defendant could not substantiate his claim that he was working in Southern California
 36 when his parents were killed. He showed an interest in the sign-in sheets for March
 37 31 and could have signed them after the fact. As we noted above, there is a conflict in
 38 the evidence whether a signature on a sign-in sheet necessarily means the signer was
 39 physically present at the meeting.

40 Defendant had the financial motive to kill his parents. He had a checkered financial
 41 history, always seemed to need large amounts of money, and owed his parents at least
 42 \$30,000. Soon after their deaths he applied for life insurance benefits.

43 Defendant also appeared to be highly emotional and unstable. Several people saw
 44 him pretend to cry but shed no tears. He told suspicious stories. He claimed at
 45 various times to have cancer, to have been exposed to Agent Orange, and to be a
 46 covert gunrunner for the CIA, selling arms to foreign governments in exchange for
 47 gold, gems, and securities. This evidence bearing on his financial background and his
 48 reaction when discussing the murders of his parents, also went to his credibility.

1 The evidence is sufficient to support the murder convictions.

2 Cal. Ct. App. Opinion, pp. 20-22.

3 The "Due Process Clause protects the accused against conviction except upon proof
 4 beyond a reasonable doubt of every fact necessary to constitute the crime with which he is
 5 charged." In re Winship, 397 U.S. 358, 364 (1970). A federal court reviewing collaterally a
 6 state court conviction does not determine whether it is satisfied that the evidence established
 7 guilt beyond a reasonable doubt, but rather determines whether, "after viewing the evidence
 8 in the light most favorable to the prosecution, any rational trier of fact could have found the
 9 essential elements of the crime beyond a reasonable doubt." Jackson v. Virginia, 443 U.S.
 10 307, 319 (1979). Only if no rational trier of fact could have found proof of guilt beyond a
 11 reasonable doubt may the writ be granted. Id. at 324. The "prosecution need not
 12 affirmatively 'rule out every hypothesis except that of guilt,'" and the reviewing federal court
 13 "'faced with a record of historical facts that supports conflicting inferences must presume –
 14 even if it does not affirmatively appear in the record – that the trier of fact resolved any such
 15 conflicts in favor of the prosecution, and must defer to that resolution.'" Wright v. West, 505
 16 U.S. 277, 296-97 (1992) (quoting Jackson, 443 U.S. at 326). The Ninth Circuit has
 17 explained that "[c]ircumstantial evidence and inferences drawn from it may be sufficient to
 18 sustain a conviction. . . . Nevertheless, 'mere suspicion or speculation cannot be the basis for
 19 creation of logical inferences.'" Walters v. Maass, 45 F.3d 1355, 1358 (9th Cir. 1995).¹ A
 20 federal habeas court applies the standards of Jackson with an additional layer of deference
 21 under the AEDPA, generally asking whether the state court's decision reflected an
 22 unreasonable application of Jackson and Winship to the facts of the case. Juan H. v. Allen,
 23 408 F.3d 1262, 1274-75 (9th Cir. 2005), cert. denied, 546 U.S. 1137 (2006).

24 The California Court of Appeal's decision was not contrary to or an unreasonable
 25 application of clearly established federal law. The state court used the applicable federal
 26 standard, even if it did not mention Jackson or any other specific federal case, and reasonably
 27 rejected the claim. See Early v. Packer, 537 U.S. 3, 8 (2002) (per curiam) (not necessary to
 28 cite Supreme Court cases for § 2254(d) to apply).

Viewing the evidence in the light most favorable to the prosecution and drawing all reasonable inferences therefrom in the prosecution's favor, a rational jury could have found that Petitioner was the killer and the killings occurred on March 31, 1999. Bearing in mind that it "must respect the province of the jury to determine the credibility of witnesses, resolve evidentiary conflicts, and draw reasonable inferences from proven facts," Walters, 45 F.3d at 1358, the court discusses the evidentiary highlights of this long trial.

Blood On The Towel: Evidence of Petitioner's blood on a kitchen towel found in the master bathroom sink was highly incriminating under the circumstances. There was virtually no contest that the DNA testing showed Petitioner to be the source of the blood, and ruled out his parents and brother as the source of that blood. The question thus was not whether the blood was his, but rather was when was it put on the towel? On that point, the evidence and reasonable inferences were catastrophic for Petitioner. It had been about ten months since he had last been in the home before the killings. The stain was noteworthy in size, as it looked to be "approximately a half an inch wide by an inch – approximately an inch and a quarter long." RT 2043. While the towel certainly was not dripping with blood, a blood stain of that size on a kitchen towel belies Petitioner's assertion that it was "tiny" and could have been missed by Mary Ann. Appellant's Reply Brief, p. 8. Also, the towel had not been laundered since the blood was deposited. This could be inferred from the uncontradicted testimony of an evidence technician that he was unaware of any DNA test that could have been performed successfully for DNA after detergent had been used on the blood. Further, the stained towel was wadded or balled up in the master bathroom sink bowl, making it reasonable to infer that the master bathroom sink had not been used since the towel was put there. This evidence about the DNA, the size of the bloodstain, the towel's condition and the towel's location allowed the jury to infer that this was a new blood stain on a towel that was put in the sink very recently. A rational trier of fact could have concluded that the stain was left on the towel by the killer. Petitioner had been in the house not more recently than ten months before the killings and told his siblings that he had haircuts and nosebleeds there over the years, but that evidence was not such as to prevent a reasonable jury from rationally

1 concluding that Petitioner deposited that blood stain the day he was in the house killing his
 2 parents.

3 Petitioner urges that his case is a DNA-only case and should be viewed like a
 4 fingerprint-only case, such as Mikes v. Borg, 947 F.2d 353 (9th Cir. 1991), cert. denied, 505
 5 U.S. 1229 (1992), in which the court addressed a situation where the only evidence linking a
 6 defendant to a crime scene or murder weapon was a fingerprint. The problem with
 7 Petitioner's fingerprint-only analogy is that this is not a DNA-only kind of case. There was
 8 independent circumstantial evidence connecting Petitioner to the crime scene on the day of
 9 the killing, such as the excessive mileage on his rental car, his financial and marital secrecy
 10 motives to kill these particular people, and the evidence suggesting that the victims knew
 11 their killer. See Bean v. Calderon, 163 F.3d 1073, 1087 (9th Cir. 1998), cert. denied, 528
 12 U.S. 922 (1999) (Mikes rule did not apply because fingerprint evidence was supplemented
 13 with other circumstantial evidence of guilt). Petitioner was a suspect months before the
 14 DNA results came back, although he was not arrested until the DNA test results identified
 15 him as the donor of the blood. Further, the fingerprint-only analogy is particularly inapt
 16 where the defendant is not a stranger to the victim or crime scene: family members'
 17 fingerprints would not be unexpected in a family home.

18 Even if this was considered a DNA-only case, Petitioner's argument that Mikes
 19 governs would fail. In Mikes, the Ninth Circuit explained how certain fingerprint evidence
 20 should be viewed:

21 [I]n a case in which the prosecution's theory is that the defendant's fingerprints
 22 were placed on the murder weapon at the time of the commission of the crime
 23 or were left at the scene of the crime during its commission, the record must
 24 show that the object was inaccessible to the defendant or that the defendant did
 25 not have access to the crime scene, during the relevant period prior to the
 26 crime's commission.

27 Mikes, 947 F.2d at 361. The Mikes case had facts that are distinguishable from Petitioner's
 28 case, and those facts lead to a different outcome for Petitioner. In Mikes, the victim was
 killed with a metal post from a disassembled turnstile which the victim had bought four
 months earlier at a hardware store's going-out-of-business sale. The victim had stored the

1 turnstile posts in his private basement. Mikes' fingerprints were on the post, but nowhere
 2 else at the crime scene. The fingerprints were the only evidence linking Mikes to the crime
 3 scene. Those prints were not enough, concluded the Ninth Circuit, because the posts were
 4 accessible and very likely to have been touched by the general public in the store before the
 5 victim bought the posts, there was testimony that the prints could last indefinitely on the
 6 posts, and Mikes' fingerprints were not identified elsewhere at the crime scene. Petitioner's
 7 case differed in a few key respects from that in Mikes: The evidence was blood, not
 8 fingerprints, and blood by its very nature is not deposited with the ease of fingerprints (i.e.,
 9 fingerprints are left on almost every surface a person touches while blood is not routinely left
 10 behind and usually connotes a trauma of some sort has happened to the depositor).
 11 Petitioner's blood was left on an object that would not be expected to be left in the condition
 12 it was in or in the place it was in for any considerable amount of time. People do not
 13 generally leave towels in the sink while using the sink and one would not expect a tidy
 14 housekeeper not to deal with a noticeable bloodstain on a towel.

15 Contrary to Petitioner's assumption, Mikes does not lay down a blanket rule that a
 16 defendant can never be convicted in a fingerprint-only case. The Ninth Circuit recognized
 17 that Mikes does not cover all fingerprint-only cases in Taylor v. Stainer, 31 F.3d 907 (9th
 18 Cir. 1994). There, a fingerprint was found on the bottom edge of the victim's window sill.
 19 The Taylor court distinguished Mikes on the facts:

20 The turnstile and the posts in Mikes had been in a store -- a public place where anyone
 21 could have had access to them. The inside of [the victim's] windowsill was not in a
 22 public place, and Taylor would not have had access to it absent some unusual
 23 circumstance. Moreover, the print was found precisely at the point of entry for this
 24 burglary-murder, and the location of the print under the sill strongly suggests it was
 25 left by someone crawling through the window. Thus, Mikes does not control here.
 26 To hold that the evidence against Taylor was insufficient, we would have to extend
 27 Mikes to cover fingerprints that are found in places or on objects that were never
 28 accessible to the general public and that can be explained in a manner consistent with
 innocence only through far-fetched, unsupported speculation. This we decline to do.
Taylor, 31 F.3d at 909-10. If the fingerprint-only line of cases applied, Petitioner's case
 would be more similar to Taylor than to Mikes because of the place and nature of a visible
 blood stain on a towel in the sink bowl of a bathroom in use by a tidy housekeeper strongly

1 suggested it had not been there very long at all. In light of the evidence that Petitioner had
 2 not been in his parents' home for about ten months, the presence of his blood on that towel
 3 could be "explained in a manner consistent with innocence only through far-fetched,
 4 unsupported speculation," *id.* at 910. And, as noted earlier, the rationale for the fingerprint-
 5 only line of cases does not fit well with a situation in which a person has an established
 6 connection with the site at which the evidence is deposited.

7 The DNA evidence was, as mentioned, key to the prosecution. Petitioner had not
 8 recently visited the house. He told police he had been there about a year earlier, perhaps the
 9 Memorial Day weekend the year before the murders took place. He later told police he had
 10 been there within the year, but provided no specifics as to when those visits occurred and
 11 presented no evidence showing any such visits. When the police asked for hair and blood
 12 samples, Petitioner told his brother and sister that he had nose bleeds and hair cuts at the
 13 house in the past – statements that under the circumstances seemed more reflective of a
 14 guilty conscience than a credible explanation for the blood's presence. The evidence
 15 presented certainly permitted a rational jury to conclude that he had not been at the house for
 16 more than ten months before the killings and that his blood got on the towel on the day he
 17 killed his parents.

18 Time Of Death - Signs Of Life Activity: Time of death is not an element of the crime,
 19 but was key here because March 31 was the only date as to which the prosecutor tried to
 20 show that Petitioner travelled to Nice, and there was evidence that he was back at home in
 21 Valencia by 6:26 p.m. that night to make a telephone call. The time of death evidence
 22 included a lot of evidence about the signs of life activity in the household as of March 31 and
 23 evidence about the condition of the bodies.

24 Evidence showed that there was no activity in the household after the morning of
 25 March 31 until the bodies were discovered on April 6. Neighbor Joseph Burke saw Donald
 26 on March 30. There was no evidence that anyone saw Donald or Mary Ann alive thereafter.
 27 Mail that accumulated in the couple's post office box included the March 31 newspaper as
 28 well as newspapers for the following days. There were messages on their answering machine

1 from and after March 30. Telephone calls made to them on and after March 31 were not
 2 answered. Records showed that in the days before their death, there were regular phone
 3 calls, store purchases and other financial activity. There was no evidence they had left town
 4 for a trip, although Petitioner urges that could explain the absence of activity after March 31.
 5 The couple's internet account had last been accessed at about 7:05 a.m. on March 31. There
 6 was a small amount of mold in one of the coffee mugs and in the coffee pot. The clocks in
 7 the house were an hour behind the correct time, and daylight savings time had begun on
 8 April 4. The evidence that supported an inference that they were killed on the *morning* of
 9 March 31 included the absence of activity after the 7:05 a.m. internet access, the uncleared
 10 coffee mugs and pot, and a clock that had fallen had stopped at 10:25. Also, the unclaimed
 11 newspaper for March 31 suggested their lives had ended that morning as they habitually went
 12 to the post office in the late morning to retrieve their mail.

13 Time Of Death - Condition Of The Bodies: Neither of the pathologists who testified
 14 could pinpoint the time of death, although they agreed the bodies were in the early stages of
 15 decomposition. Dr. Gill, a forensic pathologist who did the autopsies on the victims, could
 16 not determine the time of death, other than to say it had occurred in "an interval of days." RT
 17 2677. Defense forensic pathologist Dr. Lawrence opined that the victims had been dead 3-4
 18 days, give or take a day, at the time their bodies were discovered. Factors including ambient
 19 temperature, humidity, and insect activity affect the rate of decomposition. The greater the
 20 passage of time, the more difficult it is to determine the time of death. Dr. Lawrence stated
 21 that where the body is decomposed, it is often best to determine time of death from other
 22 evidence, "such as when the lights are on or off, when the mail was picked up, what
 23 newspapers are on the porch and so forth. It's very important when the person was last seen
 24 alive." RT 2979. He had not done any of that kind of investigation and gave his opinion that
 25 the victims had been dead 3-4 days, give or take a day, based his the condition of the bodies
 26 as photographed and described, an ambient temperature of 74 degrees (based on the
 27 thermostat setting), and information that no one first on the scene smelled any unusual odor.
 28 He thought it was very unlikely that the bodies had been there for 6-7 days.

1 The pathologists agreed that the warmer the ambient temperature, the faster the
2 decomposition. However, the evidence on ambient temperature near the bodies was
3 equivocal. Several people described the house as uncomfortably warm on April 6 and the
4 thermostat was set at 74 degrees. However, Donald's body was found in a laundry room,
5 which may have been colder than other parts of the house because the laundry room was
6 between the living room and the garage, and there was a heavy self-closing door separating
7 the laundry room from the living room. Mary Ann's body was found on the floor near the
8 front door and a wood stove that may have had a draft. The bodies were both at the same
9 stage of early decomposition. If they were in an ambient temperature cooler than 74 degrees,
10 such as 60-65 degrees, the decomposition would be slower, the absence of reports of malodor
11 would have not been surprising, and the estimates of days since death would have been
12 affected. For example, Dr. Lawrence stated that if the temperature was 60 or 65 degrees, the
13 victims could have been dead for 6-7 days when found.

14 The defense made much of the fact that one law enforcement officer noted rigor
15 mortis, but the evidence on rigor mortis did not undermine the prosecution's case that the
16 murders occurred on March 31. Sergeant McMahon stated he felt rigor mortis when he
17 touched the back of Mary Ann's neck for a pulse. However, other police at the scene,
18 including detective Paulich who helped later to move the bodies did not observe rigor mortis.
19 Rigor mortis was described as the rigidity of the body that develops over time after a person
20 dies, RT 2762, involving chemical changes in the skeletal muscles and voluntary muscles
21 used to move body parts. RT 2767. If a body is in full rigor mortis, the limbs are locked in
22 place and there is a resistance to movement such that the limbs cannot be moved generally
23 while in rigor. RT 2768. Dr. Gill testified that rigor mortis reaches a maximum at about 8-
24 12 hours after death and is gone at about 36 hours after death, plus or minus as much as 12
25 hours. RT 2762, 2765. Dr. Lawrence testified that rigor reaches a maximum in 5-6 hours
26 and then starts disappearing at 24 to 36 hours. RT 2975. Ambient temperature and the
27 decedent's physical activity preceding death can affect the length of this process. RT 2762.
28 Neither pathologist testified that rigor mortis would be observed in the back of a person's

1 neck. Dr. Lawrence explained that sometimes the decomposition process could produce an
 2 effect of subcutaneous gas that could seem to be stiffening of the body and that the person
 3 who observed rigor could have been mistaken.

4 The condition of the bodies was a difficult issue for the prosecution, as neither was
 5 beyond the early stages of decomposition and none of the people that entered the home on
 6 April 6 described a pronounced malodor. Some officers detected no odor, while a criminalist
 7 detected the odor of decomposition when he first entered the residence. Some of the blood
 8 under Mary Ann's body was still liquid: the large pool of blood on the carpet under her was
 9 somewhat dried on top and wet underneath, and the blood on her sweatshirt was still partially
 10 wet. The evidence was not such as to show that it was irrational to conclude that the victims
 11 were killed on March 31.

12 Opportunity/Alibi Evidence: The prosecutor presented evidence to try to prove that
 13 petitioner had the opportunity to and did travel to Nice to commit the crime on March 31.
 14 The defense countered with an alibi defense. The way an alibi fits into the reasonable doubt
 15 picture is that it need only raise a reasonable doubt that the defendant was not present at the
 16 scene of the crime. See People v. Costello, 21 Cal.2d 760, 766 (Cal. 1943); CALJIC 4.50
 17 ("If, after a consideration of all the evidence, you have a reasonable doubt that the defendant
 18 was present at the time the crime was committed, you must find him not guilty."); Ninth Cir.
 19 Model Crim. Jury Instr. No. 6.3 (substantially the same as CALJIC 4.50). So the question
 20 here was whether Petitioner's evidence that he was at work at a Boeing plant in Long Beach
 21 raised a reasonable doubt that he was in his parents' house on March 31.

22 The prosecutor presented evidence that Petitioner put enough mileage on a rental car
 23 to make the trip. He rented a car in Long Beach on March 30, and put 1,128 miles on it in
 24 two days before returning it April 1. The round-trip distance from the car rental agency to
 25 the victims' home via Duvardo's home was 1,046 miles. The defense presented evidence
 26 questioning the accuracy and reliability of the car rental agency's record-keeping. A
 27 detective who drove the route determined that it took about 6 hours and 45 minutes to travel
 28 from the victims' home in Nice to Petitioner's home in Valencia. (The additional time to

1 travel from Petitioner's home to the car rental agency did not matter because the theory was
2 that Petitioner woke up early, drove from his home to Nice, killed his parents, and returned
3 home before 6:26 p.m. The prosecutor therefore only needed to show the amount of time to
4 travel between Valencia and Nice and make allowance for time to commit the crimes and
5 ransack the house.) Petitioner's own car was in a shop for repairs on these days; the evidence
6 was disputed when certain additional repairs were authorized.

7 The defense presented evidence that Petitioner had been at work at a Boeing plant in
8 Long Beach on March 31 and had signed attendance sign-in sheets for two meetings that day.
9 His was one of about 30 signatures on one sign-in sheet; no one had a specific recollection of
10 him being at the meeting but some witnesses believed he would have been there if he signed
11 the sheet.² The prosecution countered with evidence that showed it was possible for
12 Petitioner to gain access to and sign the sign-in sheets days after the meetings, although there
13 was no evidence that anyone saw him sign the sheets after-the-fact. The prosecution
14 presented evidence that Petitioner had not used his employee scan pass to access various
15 facilities at Boeing on March 31, but the defense countered with evidence that the scanning
16 points could be and often were bypassed by workers. There was evidence that Petitioner had
17 not accessed his computer files on March 31 and could have been absent from the office
18 without being noticed for a day or two. There were also other days on which he had not had
19 computer activity.

20 There was evidence that Petitioner did not use his cell phone on March 31, and did not
21 access his ATM that day.

22 Other Evidence: In addition to the blood on the towel that pointed to Petitioner
23 specifically, the evidence that suggested the killer was someone known to the victims and
24 perceived as a friend rather than a foe included the following: there were no signs of forced
25 entry into the house, buckets of firewood found near him indicated Donald had been
26 returning from wood-gathering when attacked, and Mary Ann had been attacked from
27 behind. Another piece of evidence that suggested someone close to the Duvardos was that
28 the burglary looked staged to several law enforcement officers in that, although Mary Ann's

1 purse and Donald's wallet were gone, there were many valuable items left in sight and some
 2 things that had been disturbed or emptied appeared not to have been searched. (As explained
 3 in more detail in the next section, staging of a burglary is seen as an effort to mislead law
 4 enforcement so they won't focus on someone close to the victims on whom suspicion might
 5 otherwise fall. Though a burglary can have a variety of felonious objects, the kind of
 6 burglary mentioned in this case is the common entry into a residence to steal things) The
 7 brutality of these killings suggested a high level of anger toward the victims.³ There also
 8 was some suspicious behavior by Petitioner, including the unexpected nature of his visit to
 9 Nice with his sister on April 6,⁴ his conflicting information to police about when he had last
 10 been in the house and why he made the trip on April 6, his statements to his siblings (once
 11 police asked for hair and blood samples) that he had his hair cut and had nose bleeds many
 12 times in that house, his handling of the keys sent to him by his brother James, his lies about
 13 the reason for the loan he obtained from his parents, and his homing in on Boeing meeting
 14 attendance information for March 31 rather early on in the investigation.

15 There was of course evidence that was favorable to the defense. Neighbor Burke
 16 walked around the house on April 2, and saw nothing suspicious. A deputy checked on the
 17 house on April 5 at the request of Janet Duvardo (Petitioner's sister), and also saw nothing
 18 suspicious. This was of low probative value, however, because there was no evidence that
 19 the victims or the ransacking could be seen from outside the home. A gate that had been shut
 20 on April 2 was open on April 6, but it may have been left open by the officer who checked
 21 the property on April 5. There was conflicting evidence about which lights were on and
 22 which were off in the home, although there was some evidence that the lights were on timers.
 23 Petitioner's fingerprints were not found at the scene.

24 As the foregoing shows, this was a case in which the parties argued for conflicting
 25 inferences from the evidence. In habeas, the court assumes that the trier of fact resolved such
 26 conflicts in favor of the prosecution. Doing so, the court concludes that a rational trier of fact
 27 could have found proof of guilt beyond a reasonable doubt. The blood on the towel was
 28 highly incriminating. The sign-in sheets for the March 31 meetings gave the alibi in this case

1 real substance, but the evidence that it was possible for Petitioner to have accessed and
2 signed the sheets after-the-fact really undermined that alibi in light of the DNA evidence.
3 The alibi evidence did not raise a reasonable doubt that Petitioner was at the scene of the
4 crime on March 31. The evidence about the state of decomposition of the bodies was very
5 helpful for the defense, but the overall evidence did allow a rational jury to conclude that the
6 victims had been killed on March 31. There was sufficient evidence that Petitioner was the
7 killer and that he killed his parents on March 31. Some of Petitioner's arguments suggest
8 what the evidence might show and how a jury might view the evidence differently, but these
9 suggestions do not aid him because this court presumes that the jury resolved any conflicts in
10 the evidence in favor of the prosecution. The California Court of Appeal reasonably found
11 that there was sufficient evidence of identity and date of death to support the murder
12 convictions. Petitioner is not entitled to the writ on this claim.

13 B. Admission Of Expert's Testimony

14 Petitioner contends that his right to due process was violated by the introduction of
15 "victimology" testimony by the prosecution's expert witness, Mark Safarik. Petitioner does
16 not precisely define the term and his objection goes to more of Safarik's testimony than just
17 the portion Safarik identified as the victimology portion.

18 1. Background

19 Mark Safarik was a supervising special agent in the Behavioral Analysis Unit of the
20 F.B.I., specializing in crime analysis. He had almost 25 years of law enforcement experience
21 (7 years as a city police officer followed by more than 17 years at the F.B.I.), and had been
22 involved in investigating over 3,000 homicides. In his crime analysis work, he examined
23 very violent and unusual homicides, serial sexual assaults, sexual assaults of elderly women,
24 cases involving threats, and "equivocal" death cases (i.e., those with an unknown cause). He
25 specialized in assigning certain personality characteristics to behavior that occurred at a
26 crime scene; he did not, however, try to determine the particular person who committed the
27 crime.

28 In the Duvardo case, Safarik had done a crime analysis and written a report in July

1 1999. See CT 555-571. The report on F.B.I. letterhead apparently was not admitted as
2 evidence. It was a 17-page single-spaced document that included an introductory section that
3 described the author and the materials he considered, followed by sections labeled
4 "Victimology," "Medical Examiner's Report," "Crime Scene Analysis," "Offender
5 Characteristics and Traits," and "Post Offense Behavior." The trial court excluded testimony
6 from Safarik relating to pages 15-17 of his report that purported to identify traits of the
7 killer.⁵

8 Safarik had not visited the crime scene until the day before he testified and was not
9 involved in the investigation of the murders other than to prepare his crime analysis. To do
10 his crime analysis, he reviewed the police reports relating to the crime and investigation,
11 autopsy report, evidence reports, autopsy photos, crime scene photos, a videotape of the
12 house made after the bodies were removed, maps of the area, and diagrams of the house. He
13 also considered information provided by the victims' adult children in questionnaires they
14 had filled out about their parents' behavior and activities to do the victimology portion of the
15 report.⁶ Based on the information gathered, Safarik offered his opinion on the meaning that
16 could be drawn from several aspects of the crime scene and from information he had learned
17 about the victims.

18 Safarik's testimony presented a hypothesized narrative of the criminal activity based
19 on his interpretation of the evidence: The Duwardos let the killer into the home and did not
20 perceive him as a threat. Mary Ann had been sitting at a desk, was grabbed from behind, and
21 killed while laying on her stomach where her body was found. Donald walked in from
22 gathering firewood and discovered his dead wife's body. Donald was quickly attacked,
23 backed into the laundry room from which there was no escape, tried to defend himself, and
24 was stabbed to death before he hit the floor. The killer then ransacked the house to "stage" it
25 to look like there had been a burglary. Strangers have no reason to stage a burglary (i.e.,
26 strangers would either steal things or not, but not just pretend to steal things). Staging is an
27 attempt by the offender to misdirect law enforcement investigators. This is because the
28 offender perceives that he or she will be the focus of the police investigation. "The

1 significance of staging is that it indicates that there is a relationship of some sort between the
 2 offender and the victim." RT 854. The excessive level of violence, or overkill, suggested
 3 that the anger was personalized, and it was very significant that the overkill continued from
 4 one victim to another. He thought it would only take 10-15 minutes to do the ransacking that
 5 was done at the house.

6 Safarik offered six main opinions in this case that Petitioner protests: (1) the victims
 7 were at a low risk of becoming victims, (2) the killer was known to the victims and not
 8 perceived by them as a threat, (3) the burglary was staged to mislead law enforcement
 9 officers and divert attention away from someone close to the victims on whom suspicion
 10 might otherwise focus, (5) the killer acted with a high level of rage or anger toward the
 11 victims, and (6) the victims were killed between about 7:30 a.m. and 10:20 a.m. on March
 12 31, 1999.

13 Petitioner contended on appeal that Safarik's testimony was improper character
 14 evidence of the victims as security conscious and the assailant as enraged, should have been
 15 subjected to a Kelly/Frye hearing, was improper expert testimony in that it was not beyond
 16 the common experience of the jury and amounted to an improper opinion on guilt, and
 17 violated due process. The California Court of Appeal found the claims waived by defense
 18 counsel's failure to make a proper and timely objection, and also rejected the claims on the
 19 merits.

20 The state appellate court rejected the contention that the testimony was impermissible
 21 character evidence. The testimony that the couple was security conscious was habit evidence
 22 rather than character evidence, and was a reasonable inference based on Safarik's extensive
 23 law enforcement background plus the information about the dead bolt on the front door and
 24 other security measures taken by the couple. The testimony that the killer must have been
 25 enraged "is also a reasonable inference, again enhanced by the agent's experience, based on
 26 the number and nature of the wounds and the obvious ferocity of the attacks." Cal. Ct. App.
 27 Opinion, p. 27.

28 The state appellate court explained that a Kelly/Frye hearing was not necessary

1 because Safarik was not offering the sort of scientific expert testimony based on new and
 2 untested scientific principles or procedures. His was "merely opinion evidence to help the
 3 jurors understand certain characteristics of the crime scene." Cal. Ct. App. Opinion, p. 26.

4 Most relevant to the claim presented in the federal habeas petition is the state
 5 appellate court's decision on the assertion that Safarik gave improper expert testimony. The
 6 court explained that, under state law, a witness may not testify to an opinion of the guilt of
 7 the defendant or to conclusions or inferences that can just as easily be drawn by the jury.

8 Here Special Agent Safarik was only adding to the jury's common knowledge his
 9 expertise of crime scene reconstruction. His task was to assist the jury in interpreting
 10 the physical characteristics of the crime scene. He brought to that task his experience
 11 in reviewing or investigating over 3,000 homicides. He did not testify to some
 12 fledgling scientific technique or to some "junk science" called "victimology." Indeed,
 13 what he dubbed "victimology" was only a small part of his testimony, and was only an
 14 analytical attempt to discover why Donald and Mary Ann Duvarado became homicide
 15 victims. His testimony was as old as Sherlock Holmes, and was properly admitted to
 16 help the jury understand certain characteristics of the crime scene. The expert
 17 testimony did not specifically address the guilt or innocence of the defendant, but
 18 provided information beyond the jurors' experience that the jurors were free to accept
 19 or reject. [footnote omitted.]

20 Even though facts may be within the knowledge or understanding of the trier of fact,
 21 the conclusions to be drawn from them may require expert testimony. The decisive
 22 consideration is whether the opinion of the expert would assist the trier of fact because
 23 the matter is beyond common experience. (People v. Harvey (1991) 233 Cal.App.3d
 24 1206, 1227.) Here the expert reached conclusions that assisted the jurors to
 25 understand the possible significance of certain connected pieces of evidence without
 26 reaching the ultimate issue of the defendant's guilt. [Citation.] For example, the
 27 expert's conclusion drawn from the number, placement, and severity of the stab
 28 wounds is no different from commonly received expert testimony that concludes that
 certain cuts on a victim's hands were defensive in nature indicating an attempt to fight
 off an assailant.

Cal. Ct. App. Opinion, pp. 25-26.

2. Analysis

The state court's evidentiary ruling may be addressed in a federal habeas action only if it violated federal law, either by infringing upon a specific federal constitutional or statutory provision or by depriving the defendant of the fundamentally fair trial guaranteed by due process. See Pulley v. Harris, 465 U.S. 37, 41 (1984); Henry v. Keenan, 197 F.3d 1021, 1031 (9th Cir. 1999), cert. denied, 528 U.S. 1198 (2000); Walters, 45 F.3d at 1357. Failure to comply with state rules of evidence is neither a necessary nor a sufficient basis for

1 granting federal habeas relief on due process grounds. See Jammal v. Van de Kamp, 926
 2 F.2d 918, 919 (9th Cir. 1991). Only if there are no permissible inferences that the jury may
 3 draw from the evidence can its admission violate due process. See id. at 920. Because this is
 4 a federal habeas case, this court does not determine whether the expert's testimony was
 5 properly admitted under state law, Ainsworth v. Calderon, 138 F.3d 787, 796, amended, 152
 6 F.3d 1223 (9th Cir. 1998), and does not consider whether the evidence passes muster under
 7 the Federal Rules of Evidence or Daubert v. Merrill Dow Pharmaceuticals, Inc., 509 U.S.
 8 579 (1993), which was not decided on constitutional grounds.

9 That the state court may have decided the witness qualified as an expert does not end
 10 the matter, as there is room for habeas relief when the expert testimony is mere quackery. If
 11 a phrenologist is allowed to give expert testimony as to a defendant's mental state during the
 12 commission of a crime, or if a psychic medium is deemed qualified to give expert testimony
 13 about a seance in which the deceased described what the defendant had done to him,
 14 fundamental fairness might require a new trial. Petitioner would have this court believe that
 15 Safarik's testimony falls somewhere between the opinions of psychic mediums and
 16 phrenologists on the continuum of quackery. The court disagrees, although it does recognize
 17 the controversial nature of crime analysis as courtroom evidence.

18 The really controversial part of crime analysis is the offender profiling part. See
 19 Malcolm Gladwell, Dangerous Minds, The New Yorker, Nov. 12, 2007, at 36; James Aaron
 20 George, Note, Offender Profiling and Expert Testimony: Scientifically Valid or Glorified
 21 Results?, 61 Vand. L. Rev. 221 (2008). Expert witness crime analysis has met with mixed
 22 results in court, with offender profiling being the least well-received. See, e.g., People v.
 23 Fletcher, 2007 WL 3072864, *20 (Cal. Ct. App. 2007) (unpublished decision) (no error in
 24 allowing F.B.I. crime analyst (Safarik) to testify about profile of typical burglar and opine
 25 that whoever killed victim and ransacked the house did not fit that profile – this was a proper
 26 subject of expert testimony, as a layperson lacks the knowledge and experience to determine
 27 how common such behavior is for burglars); id. (Safarik's testimony about characteristics of
 28 unidentified person he believed committed the murder did not have sufficient foundation for

1 its admission, but was harmless error); State v. Patton, 120 P.3d 760, 782-85 (Kan. 2005)
 2 (Frye test did not apply to F.B.I. behavioral analyst's testimony that a crime scene was staged
 3 because it was pure opinion testimony, i.e., "expert opinion developed from inductive
 4 reasoning based on the expert's own experiences, observations, or research," and the validity
 5 of which is tested by cross-examination); State v. Stevens, 78 S.W.3d 817, 835 (Tenn.), cert.
 6 denied, 537 U.S. 1115 (2002) (no error in refusing to allow F.B.I. crime analyst to testify
 7 about the probable motive of the perpetrator based on evidence at the scene of the crime);
 8 People v. Hurth, 2002 WL 1172930, *16-18 (Cal. Ct. App. 2002) (unpublished decision) (no
 9 error in allowing F.B.I. crime analyst (Safarik) to testify about "undoing" behavior by
 10 offenders and its implications); Simmons v. State, 797 So.2d 1134, 1151 (Ala. Crim. App.
 11 2000) (F.B.I. agent's testimony that crime scene indicated the offense was sexually motivated
 12 was admissible; court found this was not offender profiling).

13 Here, however, the offender profiling evidence was excluded so this court need not
 14 decide whether its admission would violate due process. Thus, this is not a case where a
 15 crime analyst has been allowed to profile the perpetrator in terms of identifying for the jury
 16 the characteristics and personality traits of the offender. The due process analysis proceeds
 17 mindful that this part of Safarik's crime analysis was not presented to the jury but also
 18 mindful that the different areas of Safarik's report have some overlap so that some
 19 information about the perpetrator was provided.

20 The admission of Safarik's testimony did not violate due process. Safarik's testimony
 21 was relevant to the issues in the trial. Most jurors have a very limited exposure to real
 22 criminal activity. Safarik's testimony was helpful to the jury in that it provided meaning to
 23 some evidence presented to the jury. For example, although the jury could look at the
 24 pictures of the crime scene and perhaps see that there were cameras, radios and jewelry
 25 boxes in the pictures, Safarik was able to provide meaning and context that went beyond that
 26 ordinarily known to lay people, i.e., that these valuable being left behind suggested this was a
 27 staged burglary, and that total strangers don't have a reason to stage burglaries, which in turn
 28 suggested the killer was someone close to the victims.

1 The victimology evidence also did not violate due process. Safarik tried to figure out
 2 why these particular people would become crime victims. From the victimology study, plus
 3 the information from family and acquaintances, plus what he saw on a site visit, Safarik
 4 opined that the victims were very security conscious even though they lived in a low crime
 5 area.

6 Petitioner suggests that Safarik essentially gave the prosecutor's closing argument in
 7 the middle of the evidence presentation. But this overlooks Safarik's law enforcement
 8 expertise and his ability to draw on that extensive experience as well as his study of crime
 9 scenes in particular to opine what certain physical evidence meant. For example, as one who
 10 had been involved in literally thousands of homicide investigations, he had extensive
 11 experience on which to base an opinion that the numerous stab wounds to both victims
 12 suggested a high level of anger. (Dr. Gill testified to a similar opinion.) This was beyond the
 13 ken of most jurors, who usually do not necessarily have any background in how many stab
 14 wounds a murder victim usually has, or the number or nature of stabs that will kill a person,
 15 or the implication of numerous stab wounds.

16 Petitioner argues that it is improper for an expert to express an opinion concerning the
 17 guilt or innocence of the defendant. But he neglects to note that this expert never offered
 18 such an opinion. RT 814 (the analysis is a tool to help focus the law enforcement
 19 investigation; "[w]e never, ever identify a particular offender.") Safarik never identified
 20 Petitioner as the killer; the closest he came was to say that the killer was someone known to
 21 the victims. Even if Safarik had opined on the ultimate issue, that alone would not
 22 necessarily support habeas relief. The United States Supreme Court has left open the
 23 question whether the Constitution is violated by the admission of expert testimony
 24 concerning an ultimate issue to be resolved by the trier of fact. See Moses v. Payne, 543
 25 F.3d 1090, 1105 (9th Cir. 2008). Thus, while, under Ninth Circuit precedent, it is "well
 26 established . . . that expert testimony concerning an ultimate issue is not per se improper," id.
 27 at 1106 (quotation and citation omitted), for purposes of habeas corpus review it suffices to
 28 determine that no Supreme Court case has squarely addressed the issue and, therefore, a state

1 appellate court's decision affirming the admission of such testimony is not contrary to or an
 2 unreasonable application of clearly established Supreme Court precedent under 28 U.S.C.
 3 § 2254(d)(1). See id. at 1106.

4 Petitioner correctly notes that Safarik's testimony that Donald was "probably pleading
 5 for his life," RT 840, was beyond the scope of his expertise and pure speculation. That
 6 statement did not make the trial fundamentally unfair or have any prejudicial effect. The jury
 7 was confronted with a case in which a septuagenarian husband and wife apparently going
 8 about their normal household activities were brutally stabbed to death, so the witness'
 9 speculation that Donald – as to whom there was uncontradicted evidence of more than a
 10 dozen stab wounds in his chest area and defensive wounds to his hands – may have begged
 11 for his life hardly painted a worse picture of the murders and did not inflame the jury's
 12 passion. Cf. Drayden v. White, 232 F.3d 704, 712-13 (9th Cir. 2000), cert. denied, 532 U.S.
 13 984 (2001) (prosecutor engaged in misconduct when he delivered a soliloquy in the voice of
 14 the victim as his closing argument).

15 The admission of Safarik's testimony did not render Petitioner's trial fundamentally
 16 unfair. The California Court of Appeal's rejection of Petitioner's claim was not contrary to or
 17 an unreasonable application of clearly established federal law. Petitioner is not entitled to the
 18 writ on this claim.

19 C. Admission of Evidence of Financial Dealings And Marriages

20 Petitioner contends that admission of evidence of his financial dealings and dual
 21 marriages violated his right to due process. The evidence regarding Petitioner's financial
 22 dealings and marriages was described by the California Court of Appeal's opinion at pages
 23 12-15.

24 There was evidence about Petitioner's dual marriages. He and Jan Duvardo were
 25 married in 1980 and separated in 1989. Petitioner and Jan did not divorce until long after
 26 these murders. While still married to Jan, he married Molly in 1993. He paid child support
 27 for Nicole (his daughter with Jan) until 1993. When Jan heard he had remarried and
 28 confronted him in 1993 or 1994, Petitioner claimed "his current relationship was a 'spiritual

1 union,' and that he had 'some sort of physical ailment where he felt that he might very
 2 possibly die, and he did not want to die alone.'" Cal. Ct. App. Opinion, p. 12. Jan twice
 3 avoided foreclosure on her house by borrowing money from Petitioner; when she faced
 4 foreclosure again in late 1998, she told Petitioner but did not ask him for money. Jan lost her
 5 house and moved in with her parents in January 1999.

6 There was evidence about Petitioner's financial dealings that showed that he borrowed
 7 money from several people, often did so unbeknownst to his wife Molly, and often told lies
 8 in connection with obtaining the loans. First, he borrowed \$7,500 from Edward Clevenger in
 9 November 1997 and repaid it by July 1998. Molly mentioned to Clevenger that she
 10 borrowed money from her 401(k) account to repay the loan. Second, Petitioner borrowed
 11 money from his friend Ken Ferguson in April 1998. The evidence was that Petitioner
 12 "became very distraught and cried, claiming he needed \$10,000 to pay off some debts or he
 13 would lose custody of his daughter. Defendant knew that Ferguson's wife had died of cancer
 14 the previous year, and Ferguson had received \$150,000 from a life insurance policy." Cal.
 15 Ct. App. Opinion, p. 13. Ferguson tried repeatedly to get the loan repaid in 1998, and
 16 Petitioner repeatedly deferred – often claiming he was working on repayment, another time
 17 claiming he was selling a house and would soon have the money, another time claiming he
 18 had cancer from his platoon's exposure to Agent Orange in Vietnam, another time grabbing
 19 his chest and claiming he was dying of cancer, and another time claiming that Molly had
 20 found out about a "'a gun deal that had gone bad.'" Cal. Ct. App. Opinion, p. 13. When
 21 Ferguson told Molly about the loan, she was surprised and had not known about the loan.
 22 Molly repaid the loan, after saying Ferguson should have contacted her before lending
 23 money to Petitioner. Third, he borrowed \$54,000 from Douglas Bernards, an acquaintance
 24 from Molly's equestrian hobby in June 1998, claiming he could repay the loan from the sale
 25 of a house and securing the loan with a second deed of trust on the house he owned with
 26 Molly. Petitioner repaid that loan in three installments: \$30,000 on November 24, 1998,
 27 \$10,000 on December 18, 1998, and the balance on March 1, 1999. Petitioner initially told
 28 Bernards he did not want Molly to know about the loan, but she eventually learned of it.

1 Fourth, he borrowed from his parents. The circumstances of that loan were explored at
 2 length during the trial:

3 A friend of the Duvardos [Georgia Floheisch] testified that she learned from them that
 4 defendant claimed he needed money in late November 1998. Supposedly, defendant
 5 had told his parents he had been involved with "some sort of government service" –
 6 and in connection with that service, through "some sort of a transport of money or
 7 goods," a certain amount of money was missing. The Duvardos said they were going
 8 to loan money to defendant, but the loan would be documented and they would charge
 9 him interest.

10 Also in November 1998, defendant contacted Donald's sister, Novell. Defendant was
 11 upset and said he was in trouble. He said he had forged Molly's signature on a second
 12 trust deed and needed \$26,500. Molly had stopped sleeping with him and defendant
 13 thought she might divorce him. . . .

14 On the next day defendant brought Donald and Mary Ann to meet Novell and her
 15 husband Ronald. Defendant said he had been working undercover for the Central
 16 Intelligence Agency for "the thrill of it." He sold guns to foreign governments. He
 17 had received \$5 million for one gun shipment but was \$200,000 short. He had made
 18 up \$150,000 of that deficit with gold bullion and gems he had received as payment for
 19 his services, but was still \$50,000 short. If he didn't come up with that sum by
 20 November 30, 1998, he would be killed– or so he said. Defendant sobbed during this
 21 tale. Ronald saw no tears. Ronald was "very suspicious of the story that we were
 22 hearing." Novell and Ronald discussed various loan options with defendant, but he
 23 never got back to them.

24 Analysis of [Donald and Mary Ann] Duvardos' financial records showed they took out
 25 a short-term loan on November 24, 1998, for \$30,000. The loan was secured by a CD
 26 account. The proceeds were paid by check to defendant, who endorsed the check to a
 27 business owned by the Bernards. On April 9, 1999–just days after the Duvardos were
 28 killed–the bank withdrew over \$30,000 from the CD account to satisfy the loan
 balance, plus interest. There was no record of a separate \$10,000 payment from the
 Duvardos to defendant. . . .

19 [During an interview with police several weeks after the murder], Defendant said he
 20 had borrowed \$40,000 from his parents on one occasion, and \$10,000 on another. But
 21 his parents had recently forgiven the \$30,000 loan. He needed money due to "bad
 22 business decisions." Defendant became emotional during one interview and appeared
 23 to be crying – but the detective saw no tears. Defendant also told detectives he
 24 worked for a covert agency—he led a five-man team that delivered guns and explosives
 in exchange for gold, diamonds, and stocks and bonds. On one occasion, he came up
 \$200,000 short, and borrowed \$30,000 from his parents in November 1998 to help
 make up the deficit. [¶] In another interview defendant denied working for a covert
 agency. . . .

25 Cal. Ct. App. Opinion, pp. 14-15.

26 The California Court of Appeal emphatically rejected Petitioner's claim that this was
 27 irrelevant and impermissible character evidence. "We need not belabor this point.
 28 Defendant's intent and motivation were at issue. The evidence, particularly the financial

1 evidence, was certainly relevant to defendant's motive for killing his parents. And character
 2 evidence may be admitted to show motive, intent, design or plan, absence of mistake, and the
 3 like. [Citations.] The admission of the background circumstances put the financial straits of
 4 the defendant in context." Id. at 27 (citations omitted).

5 As mentioned in section B above, the trial court's evidentiary ruling may be addressed
 6 in a federal habeas action only if it infringed upon a specific federal constitutional or
 7 statutory provision or deprived the defendant of the fundamentally fair trial guaranteed by
 8 due process. Only if there are no permissible inferences that the jury may draw from the
 9 evidence can its admission violate due process. See Jammal, 926 F.2d at 920. Further, even
 10 if the admission of the evidence was constitutionally erroneous, it must have to have a
 11 substantial and injurious effect on the jury's verdict for habeas relief to be proper. See
 12 Dillard v. Roe, 244 F.3d 758, 767 n.7 (9th Cir.), cert. denied, 534 U.S. 905 (2001) (quoting
 13 Brecht v. Abrahamson, 507 U.S. 619, 623 (1993)).

14 The state court's rejection of Petitioner's due process claim was not an unreasonable
 15 application of or contrary to clearly established federal law. The admission of the financial
 16 dealings and marriage evidence was not arbitrary or so prejudicial that it rendered the trial
 17 fundamentally unfair. The evidence was relevant to Petitioner's motive. Petitioner may have
 18 preferred a sanitized version of the evidence that showed only that he borrowed money and
 19 had financial difficulties, but the prosecution's theory was that there was more than one
 20 motive underlying his actions. It also was important to the prosecution theory to show that
 21 the various problems Petitioner had were interrelated, e.g., that he not only had a motive to
 22 avoid repaying the \$30,000 loan from his parents, but also to keep his wife Molly from
 23 learning of that loan and other loans obtained without her permission and wanted to keep his
 24 wife Molly from learning that he was still married to his first wife (Jan). The multiple
 25 motives showed the magnitude of the problems Petitioner faced. The evidence about his
 26 various lies to obtain loans, to avoid repaying loans, and about the loans was relevant to
 27 show the interrelatedness of the multiple motives and how many things could quickly unwind
 28 for Petitioner if the loan from his parents was unpaid and became known to Molly. The

1 evidence about his parents' finances showed they did not have substantial funds such that
 2 they could let the loan go unpaid, as they had to take out a short-term loan themselves to lend
 3 the money to Petitioner after he said he'd be killed if he didn't come up with the money to
 4 complete an arms shipment. The evidence also demonstrated Petitioner's desire to keep the
 5 loans and his continuation of his first marriage secret from Molly. Molly was unaware that
 6 Petitioner had borrowed money from his parents in November 1998 until long after the
 7 murders. She also apparently had told him not to borrow money from them. On June 7,
 8 1999, Molly talked to detective Paulich and was shocked to learn that Petitioner had
 9 borrowed money from his parents and was still married to his first wife (Jan). She found it
 10 unacceptable and immediately called Petitioner, who confirmed he was still married to Jan.
 11 Petitioner also told detective Paulich that he feared losing his wife (Molly) and child more
 12 than anything and he did not want his wife to learn of his financial dealings. See CT 469-534
 13 (6/7/99 interview transcript).

14 The evidence pertaining to Petitioner's financial dealings and marriages was not
 15 offered to show that he was a bad person or had a propensity to commit violent crimes.
 16 Deliberately killing one's parents is so inexplicable that there would be a lot of resistance to
 17 believing that someone would do it. The prosecutor apparently felt it necessary to paint an
 18 elaborate picture of Petitioner's deceit and the interrelated financial and marital concerns to
 19 make believable to the jury that petitioner had a strong enough motive to do it. The evidence
 20 was relevant to motive, and its admission did not violate Petitioner's right to due process.
 21 Even if the admission of the challenged evidence violated due process, the admission of the
 22 evidence did not have a substantial and injurious effect or influence in determining the jury's
 23 verdict, in light of the other uncontested evidence regarding his financial dealings.

24 D. Ineffective Assistance Of Trial Counsel Claim

25 Petitioner contends that his trial counsel was ineffective in that he did not have tests
 26 conducted on the sign-in sheets from Boeing to see if Petitioner's signature was under that of
 27 other signatures on each page and did not have tests conducted on an envelope to determine
 28 whether it had been opened and resealed.

1 The Sixth Amendment to the U.S. Constitution guarantees not only assistance, but
 2 effective assistance, of counsel. See Strickland v. Washington, 466 U.S. 668, 686 (1984).
 3 The purpose of the right is to ensure a fair trial, and the benchmark for judging any claim of
 4 ineffectiveness is "whether counsel's conduct so undermined the proper functioning of the
 5 adversarial process that the trial cannot be relied upon as having produced a just result." See
 6 id. To prevail on an ineffective assistance of counsel claim, a habeas petitioner must show
 7 that (1) counsel's performance was "deficient," i.e., his "representation fell below an
 8 objective standard of reasonableness" under prevailing professional norms, id. at 687-88, and
 9 (2) prejudice flowed from counsel's performance, i.e., that there is a reasonable probability
 10 that, but for counsel's errors, the result of the proceedings would have been different, see id.
 11 at 691-94. The relevant inquiry under Strickland is not what defense counsel could have
 12 done, but rather whether his choices were reasonable. See Babbitt v. Calderon, 151 F.3d
 13 1170, 1173 (9th Cir. 1998), cert. denied, 525 U.S. 1159 (1999).

14 Strickland addressed the deficient investigation scenario:

15 [S]trategic choices made after thorough investigation of law and facts relevant
 16 to plausible options are virtually unchallengeable; and strategic choices made
 17 after less than complete investigation are reasonable precisely to the extent that
 18 reasonable professional judgments support the limitations on investigation. In
 19 other words, counsel has a duty to make reasonable investigations or to make a
 reasonable decision that makes particular investigations unnecessary. In any
 ineffectiveness case, a particular decision not to investigate must be directly
 assessed for reasonableness in all the circumstances, applying a heavy measure
 of deference to counsel's judgments.

20 Strickland, 466 U.S. at 690-91; see also Turner v. Duncan, 158 F.3d 449, 456 (9th Cir. 1998)
 21 (inexplicable failure to do even the most minimal investigation cannot be viewed as a
 22 strategic decision by counsel).

23 1. Boeing Sign-In Sheets

24 Petitioner contends that his trial counsel should have had three sign-in sheets from
 25 Boeing tested to determine if Petitioner's signature had been placed on each paper before
 26 other overlapping signatures. (The CRB attendance sheet and IGC CIP approval sheet
 27 appear to have signatures that overlap with Petitioner's signature; the IGC attendance sheet is
 28 not in the record before this court. See Amended Petition, Exhs. A, B.) This court assumes

1 that the test would have something to do with the layering of ink on overlapping signatures,
2 but Petitioner has not shown that such a test exists or would have produced admissible
3 results. If the results of this still-unidentified test were not admissible, he has not shown any
4 reason counsel should have had the test conducted.

5 More importantly, Petitioner has not shown, or even alleged, that such testing would
6 have yielded exculpatory evidence for him. He takes the position that "there is no harm to
7 [Petitioner] in the examination of these documents," Amended Petition, p. 38, because even
8 if he signed them last, it could not be determined whether he signed them last at the meetings
9 on March 31 or days later. His assumption that there was no downside to testing is wrong
10 because the prosecutor almost certainly would know of any testing if the prosecutor had the
11 original records, and any unfavorable results therefore would be learned by the prosecutor or
12 could be figured out by him. Additionally, merely saying there was nothing to lose is not
13 enough to oblige counsel to have the documents tested. Petitioner has not stated under oath
14 (or even alleged in his petition) that he believed he signed the sheet before the other persons
15 whose signatures overlapped his, or that he told his attorney he did. If the client could not
16 commit to that much, the attorney had no duty to have the documents tested, assuming such a
17 test existed. Even today, Petitioner appears uncertain, as he writes that his alibi would have
18 been strengthened "if [his] signature is under any other signature." Amended Petition, p. 39
19 (emphasis added). Petitioner also does not state that he asked counsel to have the documents
20 tested. Although an attorney's obligations to investigate are not necessarily dependent on a
21 client's demands for particular tests, the absence of information that Petitioner asked trial
22 counsel to have such a test done, or tried on his own to have one done, or asked a state court
23 to arrange for such testing of the documents suggests that he knows it would not have been a
24 fruitful endeavor. Cf. Langford v. Day, 110 F.3d 1380, 1386-88 (9th Cir.), cert. denied, 522
25 U.S. 881 (1997) (failure to investigate Miranda defense was not below the range of
26 competence required where defendant failed to tell attorney about facts suggesting such a
27 defense and insisted on going in another direction).⁷ He also presents no evidence he made
28 any post-conviction inquiry to attorneys to learn why the tests were not done.

1 The record shows that trial counsel did extensive work to investigate and prepare the
 2 alibi defense, strongly suggesting that counsel considered and deliberately chose not to have
 3 the signatures tested. Upon receipt of information that an area of inquiry would not be
 4 fruitful, the attorney could reasonably decide not to pursue it further. Cf. Sanders v. Ratelle,
 5 21 F.3d 1446, 1456-57 (9th Cir. 1994). Counsel apparently thought such a test existed, as is
 6 evident from his reference to it in witness examination and the closing argument. Counsel
 7 cross-examined detective Paulich about why the papers had not been tested, and received
 8 unclear answers about whether such tests existed or would have been definitive. RT 4737-
 9 4739. Detective Paulich indicated that the sheriff decided against testing the sign-in sheets
 10 because the test could not determine whether the signature ink was applied on March 31 as
 11 opposed to several days later , assuming the signature was applied last in order. In his
 12 closing argument, defense counsel urged that the prosecution's failure to conduct such a test
 13 was further evidence of inept police investigation. RT 5105, 5118. Another unrelated part of
 14 the record that indicates a conscious choice not to pursue this test is that, in preparing for the
 15 motion for new trial (by which time defendant had retained appellate counsel Dennis
 16 Riordan) new subpoenas for records relating to Petitioner's alleged presence in Southern
 17 California on March 31 were sought and obtained, yet there was no effort by counsel to have
 18 the sign-in sheets tested. See CT 854-942.

19 Even if counsel did not ponder having overlapping signatures tested, his failure to do
 20 so would not necessarily show deficient performance in light of the extensive development
 21 through other sources of the alibi defense. Focusing on that one test and ignoring all the
 22 other ways in which counsel investigated and presented the alibi defense is the kind of
 23 second-guessing that Strickland did not intend. See Pinholster v. Ayers, 525 F.3d 742, 761
 24 (9th Cir. 2008); see, e.g., Hendricks v. Calderon, 70 F.3d 1032, 1040 (9th Cir. 1995), cert.
 25 denied, 517 U.S. 1111 (1996) (duty to investigate and prepare a defense is not limitless and
 26 does not require every conceivable witness to be interviewed); id. at 1038 (no duty to track
 27 down every record regarding defendant's mental health for mental health defense). Among
 28 other things, defense counsel obtained testimony from other Boeing employees and records

1 from Boeing about Petitioner's presence on March 31, developed evidence showing the
2 lapses in Boeing security that would have allowed Petitioner to move around the plant
3 without having used his employee access card that day, and developed evidence about the lax
4 record-keeping at the car rental service about the mileage on the rental car. Counsel did a
5 very good job showing that the extensive record-keeping and tracking in the corporations
6 turned out to be riddled with problems affecting reliability. Counsel also obtained evidence
7 from Petitioner's wife about his presence on March 31 in Southern California.

8 Respondent gives the argument short-shrift, and urges that an absence of testing was
9 harmless because there was other strong evidence that Petitioner was not present at Boeing
10 on March 31. The court does not agree that the order of application of the signatures was
11 unimportant. Showing that Petitioner's signature was applied to the page before other
12 attendees' signatures could have been quite helpful to the defense. Instead, the court sees the
13 problems with the claim to be the failure to show that such a test could have been done,
14 would have resulted in admissible evidence, and would have been exculpatory. Under those
15 circumstances, Petitioner has not shown either deficient performance or resulting prejudice
16 from the absence of testing.

17 2. Envelope Containing Keys

18 Petitioner also contends that counsel should have tested an envelope he had sent to his
19 attorney tested to determine whether the envelope had been opened and resealed. James
20 Duvardo had the locks on the house changed after the murders and sent to his brother (i.e.,
21 petitioner), his sister Janet, and detective Paulich copies of the keys for the new locks a few
22 weeks after the murders. Petitioner presented evidence that he had never opened the
23 envelope, but simply stored it unopened for several months and then gave the still-unopened
24 envelope to a lawyer for safekeeping to show that he had never opened it. The prosecutor
25 argued that Petitioner could have slit the envelope open with a knife and resealed it, but
26 never presented any evidence that he had done so. The relevance of whether the envelope
27 was opened was that James Duvardo told police that he thought Petitioner had been in the
28 house based on the return of his father's memento box and his later discovery of removed

1 files and shredded documents in a trash can. At trial, the prosecutor stated in his closing
 2 argument that it was possible that Petitioner opened and resealed the envelope but stated that
 3 it "doesn't have any connection to the killings." RT 5195. The prosecutor urged the jury to
 4 look at the envelope and see that someone "could take a knife or a letter opener and slit right
 5 up along one of the edges that folds over and re-glue it. It's sticking out in an upright
 6 position. He can take the keys out and go to the other house." RT 5195.

7 Petitioner has not shown that there was a test that could definitively show that the
 8 envelope had not been opened and resealed, or that such a test would have resulted in
 9 admissible evidence. As with the signature-testing, there was no reason to test the envelope
 10 if the results would not be admissible in evidence. As the prosecutor argued at trial and
 11 respondent argues here, the jury apparently could look at the envelope and see if it could be
 12 opened and resealed. Trial counsel did develop testimony from Petitioner's wife and the
 13 receiving attorney to try to show that the envelope was never opened, so this is not a case
 14 where the line of inquiry was not explored or investigated. Also, defense counsel established
 15 that no one saw Petitioner at the house in Nice in those months and there was no evidence of
 16 him traveling to the area. Finally, the unopened vs. opened state of the envelope was
 17 somewhat of a lose/lose proposition for Petitioner: evidence that he took the unusual step of
 18 specifically choosing not to open an envelope he received from his brother three weeks after
 19 the death of their parents (e.g., to see if there was a note or anything besides the keys) might
 20 suggest a guilty conscience by a person worried about being suspected. Petitioner has not
 21 shown deficient performance or prejudice in counsel's conduct with respect to the envelope.

22 In sum, as to both the documents and the envelope, Petitioner has not shown the tests
 23 existed, the test results would have been admissible in evidence, or that the test results would
 24 have been exculpatory to him. Petitioner has not shown ineffective assistance of counsel
 25 based on the fact that the sign-in sheets and envelope were not tested. The state court's
 26 rejection of the ineffective assistance of counsel claim was not contrary to or an unreasonable
 27 application of Strickland.

28

1 E. Exclusion Of Car Evidence

2 Petitioner contends that his right to present a defense was infringed by the trial court's
 3 exclusion of evidence that cars were seen near the victims' home in the days after March 31.
 4 One neighbor (who had passed away by the time of trial) told police she thought she saw a
 5 white car in the Duvardos' driveway on Easter Sunday. Another neighbor told police that he
 6 thought he saw a small red car in the driveway on Easter Sunday. A third neighbor told
 7 police he saw a golden colored car parked near the Duvardos' driveway. These vehicles were
 8 never linked to Petitioner, the victims, friends or family of the victims, or anyone in the
 9 neighborhood. He argues now that evidence about the three cars should have been admitted
 10 to show that there was activity at the Duvardo household that showed they were still alive
 11 days after he allegedly killed them.

12 A hearing was held on a motion in limine regarding the admissibility of evidence of
 13 other persons who had been investigated by the police during their investigation of the
 14 murder and the evidence of the unrelated cars seen in the neighborhood. RT 133-160. At
 15 that time, the evidence was discussed in the context of attempting to present third party
 16 culpability evidence. The trial judge ruled that the evidence of other potential suspects and
 17 the cars was inadmissible on the record as it then stood, but specifically noted that he was
 18 open to reconsidering his ruling if the defense found more compelling evidence. RT 154,
 19 155. Due to the absence of any direct or substantial circumstantial evidence connecting the
 20 third parties or the cars to the commission of the murders, the evidence was not probative and
 21 had the likelihood to mislead the jury. See RT 154-155. The judge found it a "far stretch" to
 22 say that the cars were connected to the crime. RT 157. Defense counsel did not endeavor to
 23 argue in limine the point that Petitioner now urges, i.e., that the cars were probative of
 24 activity at the household after the day on which the prosecutor alleged the murders occurred.
 25 See CT 393-395. The admissibility of the evidence apparently was not revisited at trial.

26 The U.S. Constitution gives a criminal defendant the right to present a defense.
 27 "Whether rooted directly in the Due Process Clause of the Fourteenth Amendment . . . or in
 28 the Compulsory Process or Confrontation clauses of the Sixth Amendment, . . . the

1 Constitution guarantees criminal defendants 'a meaningful opportunity to present a complete
 2 defense.'" Crane v. Kentucky, 476 U.S. 683, 690 (1986) (citations omitted). The Due
 3 Process Clause does not guarantee the right to introduce all relevant evidence. Montana v.
 4 Egelhoff, 518 U.S. 37, 41-42 (1996). A defendant does not have an unfettered right to offer
 5 evidence that is incompetent, privileged or otherwise inadmissible under standard rules of
 6 evidence. Id. In determining whether the exclusion of evidence was constitutionally
 7 impermissible, the court balances the importance of the evidence to the criminal defendant
 8 against the state's interest in excluding the evidence. Miller v. Stagner, 757 F.2d 988, 994
 9 (9th Cir.), amended, 768 F.2d 1090 (9th Cir. 1985), cert. denied, 475 U.S. 1048, and cert.
 10 denied, 475 U.S. 1049 (1986); Perry v. Rushen, 713 F.2d 1447, 1453 (9th Cir. 1983), cert.
 11 denied, 469 U.S. 838 (1984) (no constitutional violation in excluding evidence that another
 12 man was seen near scene and that he had history of sexual attacks where identification of
 13 petitioner was strong). Even if the exclusion of evidence was a constitutional error, the
 14 erroneous exclusion must have had "a substantial and injurious effect" on the verdict for
 15 habeas relief to be granted. Brecht, 507 U.S. at 623.

16 Petitioner has not shown a constitutional violation based on the court's ruling
 17 excluding the evidence regarding the reports of cars in and near the Duvardos' driveway.
 18 First, it is questionable whether Petitioner's claim should even be entertained in habeas
 19 because he did not argue this basis for admissibility of the evidence at trial. At trial, the cars
 20 were argued to be relevant as to third party culpability rather than to show continued life in
 21 the household after March 31, so faulting the trial court for not ruling on an argument he did
 22 not make for the evidence's admissibility seems unreasonable. Second, the claim fails on the
 23 merits. The report of the deceased neighbor who saw a white car would have been
 24 inadmissible as hearsay, so there were only two reports that could have been presented – one
 25 of a red car in the driveway and another of a golden car near the driveway. But no neighbor
 26 saw any person around those cars, or saw any person go from the cars to the victims' house,
 27 or had any evidence to make the large leap from the existence of cars in the area of the house
 28 to activity in the household on Easter Sunday (April 4). The evidence would have been

1 irrelevant or at least subject to exclusion under California Evidence Code § 352, a standard
 2 rule of evidence that can be applied without offending due process. The exclusion of the
 3 evidence did not mean that the jury received a biased and false picture of the evidence,
 4 contrary to Petitioner's assertions.

5 Petitioner relies on the case of Holmes v. South Carolina, 547 U.S. 319 (2006), for the
 6 proposition that a defendant's rights "were violated by evidence rules under which the
 7 defendant may not introduce evidence of a third party guilt if the prosecution has introduced
 8 forensic evidence that, if believed, supports a guilty verdict." Amended Petition, p. 42.
 9 Holmes does not help him. In Holmes, the Court noted that rules limiting the admissibility of
 10 third party evidence were widely accepted and not challenged in that case. Holmes, 547 U.S.
 11 at 327. The rule struck down in Holmes was one that excluded third party culpability
 12 evidence if the prosecution's forensic evidence was strong. The vice of such a rule was that
 13 admissibility turned not on the probative value of the evidence but instead on the strength of
 14 the prosecution's case, and that problem was exacerbated by the absence of opportunity to
 15 challenge the prosecution's evidence in determining whether to admit the third party
 16 culpability evidence. See id. at 329. Such a rule was simply illogical in the context of
 17 normal principles of evidence. See id. at 330-31. In Petitioner's case, by contrast, the trial
 18 court did not evaluate the admissibility of the car evidence based on the strength of the
 19 prosecution's case, but instead did a routine evaluation of the evidence and concluded in
 20 accord with normal principles of the law of evidence that the evidence about other people
 21 considered by police and the cars seen in the area was not probative and was likely to
 22 mislead the jury. See Perry, 713 F.2d at 1453-55 (upholding exclusion of third party
 23 culpability evidence) Holmes did not depart from the rule that state lawmakers have broad
 24 latitude in establishing rules of evidence so long as they do not infringe upon a weighty
 25 interest of the accused and are not either arbitrary or disproportionate to the purposes they are
 26 designed to serve. See id. at 324-25. The exclusion of the evidence about the cars was
 27 consistent with the principles in Holmes, Crane, and Egelhoff.

28 Finally, in light of the weakness of the car evidence, it can be said with certainty that

1 its exclusion did not have a substantial and injurious effect on the verdict. The car evidence
 2 left so many questions unanswered and could so easily have been attacked by the prosecution
 3 – by showing the absence of any connection between the existence of the cars and any
 4 activity in the victims' household on April 4 – that its exclusion made no difference. No
 5 reasonable jury would have made the leap from cars reported in the area on April 4 to
 6 continued life in the victims' household on that date, especially in light of the physical
 7 evidence that included mold in the coffee grounds in the coffee maker two days later, the
 8 absence of any internet activity after March 31, the mail accumulating in the post office box
 9 on and after March 31, and the unanswered messages on the answering machine on and after
 10 March 31. Petitioner is not entitled to the writ on his claim that the exclusion of the car
 11 evidence violated his constitutional rights.

12 F. Cumulative Error Claim

13 In some cases, although no single trial error is sufficiently prejudicial to warrant relief,
 14 the cumulative effect of several errors may still prejudice a defendant so much that his
 15 conviction must be overturned. See United States v. Frederick, 78 F.3d 1370, 1381 (9th Cir.
 16 1996). There were not multiple errors in Petitioner's trial, so there are no errors to
 17 accumulate and consider under the cumulative error doctrine.

18 G. Ineffective Assistance Of Appellate Counsel Claim

19 The Due Process Clause guarantees a criminal defendant the effective assistance of
 20 counsel on his first appeal as of right. See generally Evitts v. Lucey, 469 U.S. 387 (1985).
 21 Claims of ineffective assistance of appellate counsel are reviewed according to the standard
 22 set out in Strickland, 466 U.S. 668. See Miller v. Keeney, 882 F.2d 1428, 1433 (9th Cir.
 23 1989). A petitioner therefore must show that appellate counsel's advice fell below an
 24 objective standard of reasonableness and that there is a reasonable probability that, but for
 25 counsel's unprofessional errors, he would have prevailed on appeal. See id. at 1434 & n.9
 26 (citing Strickland, 466 U.S. at 688, 694). The Constitution does not require appellate counsel
 27 to raise every colorable or non-frivolous claim; to the contrary, effective appellate advocacy
 28 involves weeding out weaker claims in order to focus on stronger ones. See id. Appellate

1 counsel therefore will frequently remain above an objective standard of competence and have
2 caused his client no prejudice because he declined to raise a weak issue. See id. That is the
3 case here.

4 Petitioner contends that appellate counsel was ineffective for failing to assert the
5 claims discussed in sections D-F, i.e., the claims that counsel was ineffective in not having
6 the sign-in sheets and envelope tested, that the exclusion of the car evidence was improper,
7 and that there was cumulative error. As discussed in sections D-F, however, Petitioner is not
8 entitled to any relief on those claims. Appellate counsel was within the objective standard of
9 competence and caused no prejudice by not presenting these weaker and ultimately
10 unsuccessful arguments. Petitioner is not entitled to the writ on his ineffective assistance of
11 appellate counsel claim.

12 **CONCLUSION**

13 The amended petition for writ of habeas corpus is DENIED on the merits. The motion
14 for an evidentiary hearing is DENIED. (Docket # 28.)

15 The clerk shall close the file.

16 **IT IS SO ORDERED.**

NOTES

3 1. CALJIC 2.01, the pattern jury instruction about circumstantial evidence given in this and other California cases, states:

However, a finding of guilt as to any crime may not be based on circumstantial evidence unless the proved circumstances are not only (1) consistent with the theory that the defendant is guilty of the crime, but (2) cannot be reconciled with any other rational conclusion. [¶] Further, each fact which is essential to complete a set of circumstances necessary to establish the defendant's guilt must be proved beyond a reasonable doubt. In other words, before an inference essential to establish guilt may be found to have been proved beyond a reasonable doubt, each fact or circumstance on which the inference necessarily rests must be proved beyond a reasonable doubt. [¶] Also, if the circumstantial evidence as to any particular count permits two reasonable interpretations, one of which points to the defendant's guilt and the other to his innocence, you must adopt that interpretation that points to the defendant's innocence, and reject that interpretation that points to his guilt. [¶] If, on the other hand, one interpretation of this evidence appears to you to be reasonable and the other interpretation to be unreasonable, you must accept the reasonable interpretation and reject the unreasonable.

11 Arguably, that instruction may give a defendant more benefit than that which is
12 constitutionally required, as the Supreme Court has rejected an argument that circumstantial
13 evidence requires a separate special instruction about inferences. See Holland v. United
14 States, 348 U.S. 121, 139-40 (1955) (direct appeal case rejecting contention that the judge
15 had to instruct that where prosecution's evidence is circumstantial, it must be such as to
exclude every reasonable hypothesis other than that of guilt: "the better rule is that where
there the jury is properly instructed on the standards for reasonable doubt, such an additional
instruction on circumstantial evidence is confusing and incorrect"). The Ninth Circuit model
instruction also do not give a special instruction for circumstantial evidence other than to
explain what it is. See Ninth Circuit Model Crim. Jury Instr. 1.6.

17 2. Petitioner's normal work hours were 6:00 a.m. - 2:42 p.m. at Boeing. According to
18 his wife, Petitioner usually woke up at 3:45 - 4:00 a.m., and left home at about 4:30 a.m. She
19 noticed his awakening because, at 6'2" and 280 pounds, his movements were obvious. His job duties
20 included taking proposals and estimates back and forth between the group that handled cost
21 estimates for modifications to aircraft and another unit that decided the requests for modifications.
He also coordinated things between those people calculating the costs and those who made the
decisions by ensuring that various groups had made the necessary estimates and then delivering the
packets to the appropriate group. Earlier in his career, he had worked as a police officer for a couple
of years, and at one time had worked as a security officer at the plant that later became the Boeing
plant.

22 3. The forensic pathologist testified about his autopsy findings. Donald had suffered 14-15
23 stab wounds and would have died in a matter of minutes, and he had several slicing, defensive
24 wounds on his hands. Mary Ann died from a combination of sharp and blunt force injuries that
25 would have caused death within minutes. The knife wounds to her were n her back and neck;
26 her neck was slashed front to back and she had been stabbed in the neck where she lay on the
27 floor. She also had several post-mortem stab and slash wounds on the top of her head that
28 dented but did not penetrate the skull. She had a flailed chest (i.e., fractures on both sides of her
rib cage in the front) consistent with a weight being pressed on her back, such as a person
kneeling on her back. She also had a blunt force trauma directly to one of her eyeballs and
bruising on her forehead; although the forehead bruising may have come from hitting the flat
surface of a desk as she fell, the eyeball injury could not have been so caused and was instead
from a direct hit to the eye. They had both eaten within a few hours of death, but the particular
foods could not be determined. The same kind of single-edged stabbing instrument appeared
to have been used on both.

1 4. The prosecutor argued in closing that Petitioner made the trip because he realized at some time
 2 after he left the house that he had forgotten the towel in the sink. RT 4909.

3 5. The trial court determined that Safarik could not testify about the "offender
 4 characteristics and traits" section of the crime analysis report, CT 569-571. That section of the
 5 analysis suggested the offender was a male Caucasian, at least 35 years old, who had a long-standing
 6 personal relationship with the victims; was expected to be of average intelligence and capable of
 7 having graduated high school, likely to be employed and to have an employment history
 8 commensurate with his academic background; had acted alone and nothing indicated he was under
 9 the influence of drugs or alcohol; and was expected to have a short temper. The analysis also
 10 predicted certain post-offense behavior by the offender, CT 570-571, as to which there was no
 11 interest in having admitted at trial.

12 6. The "Victimology" section explained the purpose of studying the victims and what had been
 13 learned in this case.

VICTIMOLOGY

14 Examination of the victims' background is a significant part of the analysis process. Their
 15 vulnerability to becoming victims of violent crime was examined in conjunction with a
 16 review of their lifestyle, reputation, behavior, personal history, and social and sexual habits.
 17 Specifically, what was it about these victims or their situation which made them susceptible
 18 to becoming victims of a violent crime?

19 The victims, DONALD DUVARDO, and his wife MARY ANN DUVARDO had been
 20 married more than fifty-two years. Both of them were retired and had lived for at least the
 21 last fifteen years in a well-maintained home situated in a middle class residential
 22 neighborhood in Nice, California. The crime rate in this area is very low and there had been
 23 no violent crimes involving assault, rape or homicide. Nice, California is a small residential
 24 community situated near Clear Lake with a population of roughly 2500 people in a county
 25 with a population of approximately 55,000.

26 M. DUVARDO was a seventy-year-old white female. She resided with her husband, D.
 27 DUVARDO, a seventy-six-year-old white male. The victims had three adult children. Both
 28 of the victims were reported to be in good health. They maintained a semi-active lifestyle
 29 and were involved with the National Country Square Dancers Association. According to
 30 their children, the DUVARDO'S had a fairly regular daily schedule. They generally arose
 31 around 7:30 AM, made coffee and when they were finished with the coffee, they would
 32 unplug the coffee pot [the coffee pot was found unplugged during the crime scene search.]
 33 They usually picked their mail up at the Post Office around 11:00 AM and returned home.
 34 They generally went to bed around 9:30 PM. Their neighbors described them as friendly,
 35 quiet, personable and very security conscious. Neither family members nor neighbors were
 36 aware of anyone who would want to do them harm. The victims had not reported being
 37 bothered by anyone nor did they express any concern for their safety. The children of the
 38 victims also described their parents as having a loving relationship and being quite security
 39 conscious. The victims were financially secure and lived a conservative lifestyle.

40 Overall, there is nothing in the backgrounds of both DONALD and MARY ANN which
 41 would suggest that they were at anything but a low risk and statistically unlikely of being the
 42 victims of a violent crime. Based upon the nature of the attack and the subsequent activity at
 43 the crime scene, it would be highly unlikely that the victims' deaths were at the hands of a
 44 total stranger. We feel the assailant targeted the victims, a point that will be more
 45 appropriately addressed under the Crime Scene Analysis section of this report.

46 CT 556-557 (emphasis and brackets in source).

1 7. Petitioner did not develop the factual basis of his claims in state court proceedings and
2 he has not shown that his claims fall within the narrow limits of 28 U.S.C. § 2254(e)(2).
3 Since the enactment of the AEDPA, the district court's discretion to grant an evidentiary
4 hearing has been restricted. A district court may not hold an evidentiary hearing on a claim
5 for which the petitioner failed to develop a factual basis in state court unless petitioner shows
6 that: (1) the claim relies either on (a) a new rule of constitutional law that the Supreme Court
7 has made retroactive to cases on collateral review, or (b) a factual predicate that could not
8 have been previously discovered through the exercise of due diligence, and (2) the facts
9 underlying the claim would be sufficient to establish by clear and convincing evidence that
10 but for constitutional error, no reasonable fact finder would have found the applicant guilty
11 of the underlying offense. 28 U.S.C. § 2254(e)(2).

12 Petitioner has not shown that he diligently tried but was unsuccessful in developing
13 the factual basis for his claims in state court. See Williams (Michael) v. Taylor, 529 U.S.
14 420, 431-32 (2000). Accordingly, he is not entitled to an evidentiary hearing. Even if one
15 assumes arguendo that his failure to develop the factual basis for each of his claims in state
16 court was through no fault of his, he would not be entitled to an evidentiary hearing in this
17 court because he has not made out a prima facie or colorable claim for relief. See Earp v.
18 Ornoski, 431 F.3d 1158, 1167 (9th Cir. 2005), cert. denied, 547 U.S. 1159 (2006); see also
19 Rich v. Calderon, 187 F.3d 1064, 1067 (9th Cir. 1999), cert. denied, 528 U.S. 1092 (2000)
20 (habeas "was never meant to be a fishing expedition for habeas petitioners to 'explore their
21 case in search of its existence'"). As mentioned in the text, Petitioner only urges that counsel
22 should have had the tests done because favorable results might have been found.
23 Accordingly, his motion for an evidentiary hearing is DENIED. (Docket # 28.)
